WORLD AGENTIC AI SUMMIT

19 -20 FEBRUARY 2026

BERLIN, GERMANY

We are pleased to announce the launch of the **World Agentic Al Summit** that will take place on the **19th-20th of February 2026** in **Berlin, Germany**. This cross-industry event will focus on architecturing intelligent systems, autonomous decision-making, self-learning technologies, Al-driven collaboration, ethical frameworks, human-centric solutions, next-gen models, and best practices for implementing and scaling agentic Al. Join your peers for this two-day event, offering valuable networking opportunities, practical case studies, and hands-on workshops, as we collectively uncover the role of Al agents in enhancing operational efficiency and optimizing business performance in the new era!

Key Practical Learning Points

- Embracing Agentic AI to Lead in the Era of Autonomous Decision-Making
- Optimizing Self-Learning Systems to Achieve Unprecedented Operational Efficiency
- Exploring Next-Gen AI Models to Replace Traditional Automation and Drive Innovation
- Enhancing Agentic AI with Cognitive Computing for Human-Like Reasoning
- Scaling Agentic AI with Multi-Agent Systems for Autonomous Collaboration
- Driving Business Intelligence with Agentic AI to Maximize ROI and Organizational Impact
- Turning Autonomous Systems into a Strategic Advantage for Long-Term Business Sustainability
- Leveraging Ethical AI Frameworks to Ensure Secure and Responsible Automation
- Preparing Your Workforce for the Age of Autonomous Systems

Take A Look At Our Events

Who Should Attend

This Summit is a must-attend event for senior-level professionals dealing with:

- Applied/Artificial Intelligence
- Data & Al Technology
- IT/ICT Enablement
- Digital Strategy & Transformation
- Machine Learning
- Robotic Process Automation (RPA)
- Intelligent Process Automation (IPA)
- Process Improvement & Excellence
- Natural Language Processing & Large Language Models
- Intelligent Document Processing
- & Others!

X 15+ Industry Case Studies

X 20+ Hours of Networking:

forge new professional contacts during numerous networking breaks between sessions & during the special Networking Dinner on Day 1

X 100+ Pages of the Post-Summit Materials documentation package available upon demand*

Did You Know?

€634 million today, €5.59 billion by 2030 — Europe's agentic AI market is set for explosive growth, fueled by EU regulatory momentum and corporate demand for secure, compliant AI platforms.

80% of common incidents (e.g., helpdesk tickets) can already be resolved without human intervention, with time-to-resolution slashed by 60–90%.

29% of organizations are already using agentic AI, and 44% plan to implement it within the next year—leaving only 2% not considering it at all.

In large-scale experiments combining humans and AI agents on creative workflows, teams saw a 60% boost in productivity per worker, with humans freed to focus 23% more on ideation and content creation.

09:10 "Breaking the Ice" Speed Networking Session

ARCHITECTING AUTONOMOUS INTELLIGENCE FROM THE GROUND UP

AVAILABLE SPONSORSHIP SLOT 09:50

Unlocking the Power of Agentic AI: Autonomous **Decision-Making for the Modern Enterprise**

This session reveals how Agentic Al empowers businesses to automate decision-making at scale, driving efficiency, accuracy, and agility across operations. With real-world case studies, you'll see how companies are achieving significant cost savings, enhancing decision-making precision, and transforming business operations through Agentic Al. Don't miss out on how this cutting-edge technology is shaping the future of modern enterprises. Learn how Agentic AI is streamlining processes, enabling faster responses, and creating a competitive edge in today's data-driven world. Unlock the full potential of your business with the power of autonomous decision-making.

10:30 Case Study:

From Code to Impact:

Leveraging AI Agents to Optimize Product Development and Shape Strategy

Al agents are poised to revolutionize product development and strategy. By streamlining processes, enhancing decision-making, and driving innovation, these intelligent systems offer significant strategic advantages. Explore how AI can optimize workflows, accelerate product evolution, and provide actionable insights that shape the future of development and organizational growth. Their integration into strategy formulation promises not only efficiency but also a competitive edge in rapidly evolving markets.

Pedro Rodriguez

11:00 Morning Coffee and Networking Break

11:30 Case Study:

Data-Driven Intelligence: Harnessing Insights to Optimize AI Performance

Step into the future where data isn't just numbers, but the catalyst for AI brilliance. Explore how turning insights into action can elevate AI systems, amplifying their intelligence and impact. From sharpening decision-making to accelerating innovation, this approach turns AI into a living, breathing entity that evolves and thrives on data-driven power. By unlocking the potential of data. Al becomes not just a tool, but a transformative force that anticipates needs, refines strategies, and drives continuous growth.

Mario Morales

Global Data and Al Products Lead

12:00 Case Study:

The Future of Al Agent Orchestration in Improving Business Processes and Scalability

- Optimize business processes with AI agent orchestration
- Scale operations effortlessly using Al-driven solutions
- Enhance decision-making through AI collaboration
- Automate tasks to improve workflow efficiency

Avinash Jha

Senior Director, Head of API & Integrations **Volvo Group**

Meta

12:30 Case Study:

Multi-Agent Models: Scaling Agentic Al Through **Collaboration Between Autonomous Units**

Collaborative AI systems introduce a new paradigm, where autonomous units function as a collective intelligence rather than isolated entities. By orchestrating collaboration between agents, these systems amplify problem-solving capabilities and accelerate innovation. Each agent brings a unique perspective, allowing for rapid adaptation to complex scenarios and the creation of solutions that were previously unattainable. This collaborative intelligence is the key to scaling Al. enabling it to address challenges at a global scale with unmatched agility and creativity.

Karl Tuyls

Director of AI Research Meta

13:00 Business Lunch

UNLOCKING THE POTENTIAL OF AI MODELS

14:00 Case Study:

> From Strategy to Execution: **Driving Profitability and Efficiency** with Generative Al and Agentic Al

The integration of Agentic AI, next-gen technologies, and strategic data products is reshaping business performance by turning complex challenges into scalable, AI-driven solutions. This approach drives efficiency, boosts profitability, and enhances decision-making across all enterprise functions. From strategy to execution, organizations can achieve multi-million dollar transforma-tions, delivering measurable impact across finance, supply chain, R&D, and corporate functions, ultimately enabling sustainable growth and innovation.

Shoubhik Sanyal

Head of Advanced Analytics, Generative Al and Business Enablement Mars

MARS

14:30 Case Study:

Unlocking Consumer Insights with Agentic AI

By integrating advanced Al capabilities, Agentic Al offers an unparalleled ability to gain a deeper, more personalized understanding of customer behavior, preferences, and emerging trends. Through real-time data analysis and continuous adaptive learning, businesses can extract valuable insights from vast amounts of consumer data, enabling them to create highly tailored, relevant experiences. This approach not only drives more impactful marketing strategies but also significantly enhances customer satisfaction, loyalty, and engagement,

In this session, we will delve into how Agentic Al can transform raw consumer data into actionable, predictive insights. By using sophisticated algorithms that continuously learn from customer interactions, businesses can anticipate needs, personalize offers, and optimize every touchpoint of the customer journey. Whether it's improving product recommendations, refining pricing strategies, or crafting targeted advertising campaigns, Agentic Al enables organizations to move from data collection to proactive, data-driven decision-making at scale

Consumer Insights AI Platform Manager **Philips**

PHILIPS

15:00 Case Study:

The Pitfalls of Agentic AI: When AI Agents Forget and Overcomplicate Simple Tasks

- Al agents may neglect essential data points, resulting in incomplete solutions
 Straightforward tasks can become overly complex due to unnecessary algorithmic layers
- Al agents might fail to adapt to changing data distributions or model parameters
 Introducing redundant computations, Al agents can reduce overall efficiency and accuracy
- Misalignment with expected mathematical outcomes can lead to user dissatisfaction and decreased trust

Guglielmo lozzia

Director, ML/AI and Applied Mathematics **MSD**

15:30 Afternoon Tea and Networking Break

15:50

Case Study:

From Data Pipelines to Autonomous Agents: **Preparing Enterprise Platforms** for the Age of Agentic Al

- Shift from static data pipelines to autonomous, decision-making AI agents
- Data quality and governance as the fuel for reliable autonomy
 Cloud-native, secure platforms as the foundation for agentic Al
- Built-in transparency and oversight to ensure trust and compliance
 Unlocking new business models and client personalization with agents
- Wiktoria Gromowa-Cieslik

AI-Driven Transformation: Leading Change with Autonomous Agents, **GenAl, and Cognitive Al Solutions**

Drawing from over 30 years of experience in leading complex programs, we'll discuss how these technologies are enabling enterprises to automate decision-making, enhance customer experiences, and unlock data-driven insights. From M&A integrations to AI/ML-driven data analytics, discover how to leverage AI solutions to drive competitive advantage, operational resilience, and regulatory compliance. Learn how to architect and implement next-generation AI ecosystems that propel business growth and transformation.

Nigel Guy

Director - Head of Data Migration & Data Transition, Lead on Al Adoption & Strategy **Sumitomo Mitsui Banking Corporation**

12:30

WORKSHOP O

Creating Protocols for Boundary Setting and Intervention in Autonomous Systems

This hands-on workshop will explore how to design effective protocols for setting operational limits and defining intervention triggers when autonomous agents deviate from expected behavior. Participants will learn how to

- Set clear boundaries and thresholds for autonomous agents
- Define intervention triggers when limits are exceeded
- Develop real-time response mechanisms to correct agent behavior
- Implement feedback loops for continuous improvement

By the end of the session, attendees will gain practical knowledge on creating protocols and intervention strategies to optimize autonomous systems while minimizing risks

13:00

Business Lunch

14:00

Case Study:

What Happens When 20th-Century Retail Meets 21st-Century Autonomy? A Strategic Playbook for Embedding Agentic Al into Legacy Enterprise Ecosystems

As retail giants embrace autonomy, they face a paradox: how to embed cutting-edge Al-driven systems like drone delivery within legacy operations built around stores and human workflows. In this session, the Senior Director driving national drone delivery expansion for one of the world's largest retailers shares a real-world blueprint to bridge old and new. Covering governance, risk, partner orchestration, and internal alignment, the talk reveals what it takes to fuse legacy infrastructure with agentic Al-and how that transformation unlocks new enterprise value at scale.

- The Strategic Challenge: Scaling agentic AI in a company built before the
- Partner-Led Autonomy: Governing what you don't control aligning third-party Al-driven vendors with enterprise outcomes
- Internal Readiness: Retooling permitting, store ops, and digital systems to accommodate autonomy at scale
- From Risk to Opportunity: Reframing regulatory friction, workforce disruption, and customer perception as levers for innovation
- Future-Proofing the Enterprise: Laying the groundwork for an ecosystem where drones, bots, and associates collaborate across Al-enabled workflows

Precia Carraway

Director, Engineering & Operations - Autonomous Delivery Ground & Air

Walmart

14:40 Case Study:

Quantifying ROI in Agentic AI: **Key Metrics and KPIs for Measuring Success**

- Efficiency gains: Track time and cost savings from Al automation, as it streamlines processes, reduces manual work, and accelerates execution.
- Customer impact: Measure improvements in satisfaction, engagement, and retention through personalized, data-driven experiences powered by Al.
- · Operational improvements: Quantify scalability and reduced manual effort, enabling your teams to focus on high-value tasks while AI handles the routine operations.
- Revenue growth: Measure Al's role in driving sales, uncovering new opportunities, and optimizing marketing efforts for better ROI.
- Decision accuracy: Track improved decision-making and error reduction, ensuring smarter, faster, and more reliable business choices.

By aligning these metrics with your business goals, you can truly understand the power of Agentic AI in transforming your organization's performance across the board.

Arun Kumar Sukumar

Director (Product Manager - Agentic AI Ecosystem)

15:30

Chair's Closing Remarks and End of Summit

Sponsorship, Exhibition & Speaking Opportunities

Partnering with Luxatia International means more than making the right contacts - it means being an insider, connected to the right people with the right level of influence, and being allied with a globally respected organization and leader within your industry.

To learn more about the benefits of sponsorship, exhibition and speaking opportunities and how to become more involved, please contact us <code>info@luxatiainternational.com</code>

SPOTLIGHT ON OUR SPEAKERS

WORLD AGENTIC AI SUMMIT | 19-20 FEBRUARY 2026 | BERLIN, GERMANY

Precia Carraway
Director, Engineering & Operations
- Autonomous Delivery Ground & Air
Walmart

Precia Carraway heads Strategic Expansion and Launches for the drone delivery program at one of the world's largest big box retailers. She leads the national scale-up of autonomous last-mile delivery through third-party drone operators, driving strategy, market expansion, and cross-functional launch execution. Prior to this role, she led B2B, B2C, and DoD for an internal telecom, where she oversaw performance, and operational integration of advanced IOT, AV, and UAV systems. Her career bridges legacy retail infrastructure and cutting-edge autonomy, with a focus on embedding agentic AI into complex enterprise ecosystems. With deep expertise in regulatory strategy, vendor orchestration, and technical scalability, Precia is shaping the future of drone-enabled logistics in the U.S.

Mario Morales
Global Data and Al Products Lead
- Manufacturing and Procurement Operations
PepsiCo

Mr. Morales leads global Data & Al Manufacturing Product strategy at PepsiCo, where he integrates artificial intelligence and data innovation into manufacturing and procurement operations. His expertise lies in accelerating industrial transformation through Al strategy, data governance, and scalable solutions that drive efficiency and measurable business impact. With a background in IT procurement across Europe, Asia, and Africa, Mario has helped digitize everything from supplier ecosystems to agricultural processes. He thrives at the intersection of emerging technology, operational excellence, and human collaboration, successfully navigating cross-functional programs to achieve tangible results in real factories. Mario is always open to connecting on industrial Al, data products, and the future of intelligent operations.

Karl Tuyls Director of Al Research Meta

Karl Tuyls (FBCS) is a research scientist, entrepreneur, and professor. He currently holds honorary positions as Professor of Computer Science at the University of Liverpool, UK, and Guest Professor at the University of Leuven,

Previously, Professor Tuyls was Research Director at DeepMind, where he led the Game Theory & Multi-Agent Team. He co-founded H Company in April 2024, departing in August 2024. Earlier in his career, he held academic roles at institutions including Vrije Universiteit Brussel, Hasselt University, Eindhoven University of Technology, and Maastricht University. In February 2025, he joined a leading Al company Meta as a Research Director.

Dave Drodge Group Lead Digital Transformation AI & Digital Marketing Roche

Dave Drodge has been passionately co-creating the future for the last 25 years using digital technology. He's worked in 7 industries at organizations like Sony, Amadeus, Novartis, Roche and the WWF (the Panda not the wrestlers) in varied functions (like marketing, product management, & transformation). Dave Drodge is now driving Roche's digital transformation strategy and delivery with an emphasis on Al. He's just finished writing a chapter in an upcoming book about how general-purpose Al, including Gen Al, can augment how we work from the University of Strasbourg. He is Canadian and lives in Switzerland.

Sunando Das Global Head of Predictive Analytics Unilever

Sunando Das has over 20 years of global experience in leveraging machine learning (ML), artificial intelligence (AI), and advanced technologies to drive multi-billion-dollar business impact. His leadership has delivered \$12 billion in incremental value over the past seven years, focusing on Al-driven transformations across adtech, martech, and predictive analytics. Sunando has led initiatives like AI demand predictions, Consumer 360 platforms, and ML recommendation engines that have unlocked up to \$18 in incremental sales across 80+ markets.

Recognized for solving complex, board-level challenges, Sunando specializes in personalization and digital transformation. He has optimized investments using deep learning and econometrics, generating savings of \$300M and increasing sales by \$18+.As a thought leader in Al, Ml., and media mix optimization, Sunando regularly speaks at industry forums and contributes to leading publications. He is passionate about using digital data to reshape business strategies and foster innovation.

Arun Kumar Sukumar
Director (Product Manager - Agentic Al Ecosystem)
IOVIA

Arun is a Director (Product Manager - Agentic AI) at IQVIA, with nearly two decades of experience managing complex, multi-cultural digital transformation projects. Specializing in data and analytics solutions for the pharma and healthcare industry, Arun excels in turning complex data into actionable insights to drive growth and inform decision-making. He partners closely with clients to implement fit-for-enterprise digital solutions, fostering a shared vision across business and IT organizations. Arun's leadership emphasizes collaboration, mentorship, and a compilement controlled programment of the operations.

commitment to excellence, ensuring scalable, sustainable success.

With expertise in data management, including MDM, Data Quality, Data Governance, CRM, and BI Analytics, Arun is also highly skilled in Al, particularly Agentic AI and Generative AI technologies like ChatGPT, Gemini, RAG, and MedPaLM. He is experienced in evaluation techniques such as autoraters, pairwise evaluations, and pointwise evaluations in both ML Ops and Agentic Ops.

Pedro Rodriguez
Head of Engineering
- Al SDLC Agents, Developer Experience
Google

Seasoned technology and product executive with 17 years of experience building and scaling high-performing engineering organizations at Google, Uber and Amazon. Proven track record of successfully launching and growing Al products and technology for billions of users. Tech evangelist and public speaker at global tech forums on Al, data privacy and developer tech. Passionate about fostering inclusive teams, mentoring engineers, and driving impactful results.

Guglielmo lozzia
Director, ML/AI and Applied Mathematics
MSD

Guglielmo lozzia is a Biomedical Engineer with expertise at the intersection of Mathematics, Computer Science, Data Science, and Life Sciences. With an extensive background in Software Engineering, Data Science, and ML/DL, he has applied his skills in fields such as Biotech Manufacturing, Healthcare, and DevOps. Currently leading a ML/Al and Engineering team, Guglielmo focuses on unlocking business value in Biotech/Pharma through Deep Learning projects, particularly in Computer Vision and Deep Generative Models. One of his key contributions is an automated visual inspection system for the pharma industry, which won the Manufacturing Leadership Award 2021 in the "Advanced Analytics and Artificial Intelligence Leadership" category.

Recognized as a DataOps Champion at the Streamsets DataOps Summit 2019 and named one of the Top 50 Tech

Recognized as a DataOps Champion at the Streamsets DataOps Summit 2019 and named one of the Top 50 Tech Visionaries at the 2019 Dubai Intercon Conference, Guglielmo is also an international speaker and the author of the technical book "Hands-on Deep Learning with Apache Spark" published by Packt. He is a lifelong learner, constantly pushing the boundaries of Al and Deep Learning.

Sehnaz Arasan Consumer Insights Al Platform Manager Philips

Ms. Arasan is steering Philips' Consumer Insights, focusing on developing an internal RAG & LLM-based AI platform. With expertise in creating marketing technologies that resonate with global audiences, Sehnaz combines business acumen with innovative IT solutions, grounded in her BBA from the University of Toronto. At Unilever, leplayed a key role in groundbreaking AR/VR campaigns and AI-driven consumer insights for brands like Magnum and Walls. Sehnaz excels in stakeholder management and champions personalized experiences that drive brand loyalty and sales.

Nigel Guy Director - Head of Data Migration & Data Transition, Lead on Al Adoption & Strategy Sumitomo Mitsui Banking Corporation

Nigel is a Transformation Programme Director and expert in Al, GenAl, and Data Strategy Adoption with over 30 years of experience leading high-value programmes across financial services, insurance, and technology consulting. He specializes in implementing Al/ML-driven solutions, including Autonomous Al Agents and Cognitive Al, to drive business transformation, enhance customer experiences, and optimize enterprise performance. Nigel has managed programmes up to £110M and is recognized for his work in M&A integrations, data governance, and regulatory compliance. He is available for executive collaborations focused on Al innovation and next-generation digital

Wiktoria Gromowa-Cieslik Data Engineering Platforms - Chapter Lead/Product Owner-Director

Wiktoria is a strategic technology leader with over 14 years of experience at top-tier financial institutions including UBS, ING, JPMorgan, and Credit Suisse. She specializes in bridging business needs with scalable and compliant technology solutions, with a focus on data, Al, cloud, and regulatory-driven transformation.

At UBS, Wiktoria has designed and led enterprise-scale strategies that drive innovation, regulatory compliance, and business impact. She has partnered with C-level stakeholders across Europe and Asia, directed cross-functional teams of 60+ professionals, and delivered solutions aligned with GDPR, EBA, KNF, and the emerging EU AI Act. An active voice in the global tech community, Wiktoria is a regular speaker, podcast guest, mentor, and advocate for inclusive leadership in technology. She serves as a Board Member of the Federal Association of Polish Engineers and Technicians in Germany and is an active member of global networks including DAMA (Data Management Association), AI FOD (AI for Development), and Women in Tech Global. Through these roles, she champions responsible innovation, diversity, and a strong data culture in the digital era.

Shoubhik Sanyal Head of Advanced Analytics, Generative Al and Business Enablement Mars

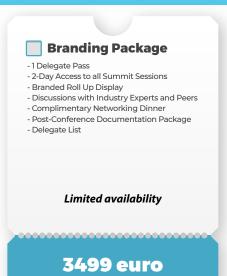

Shoubhik Sanyal has over 20 years of leadership experience at Mars UK, Deutsche Bank, EY, Dunnhumby, and Accenture, successfully leading multi-million dollar global transformations across finance, supply chain, R&D, and corporate functions. As Head of Advanced Analytics, Generative AI & Business Enablement at Mars, he drives the integration of agentic AI, next-gen technologies, and strategic data products that reshape business performance. Shoubhik specializes in turning complex, ambiguous problems into scalable, Al-driven solutions that unlock efficiency, drive profitability, and enable better decision-making across enterprises. He has architected a Generative AI-based finance insights platform, built high-performing global teams, and served as a trusted advisor to C-Suite executives. Recognized as a thought leader on Advanced Analytics and Generative AI, Shoubhik has been globally nominated at the HFS One Council.
